

VisualGIS

Integrated GIS Map Viewer for the VisualWorks Digital Video System

Overview

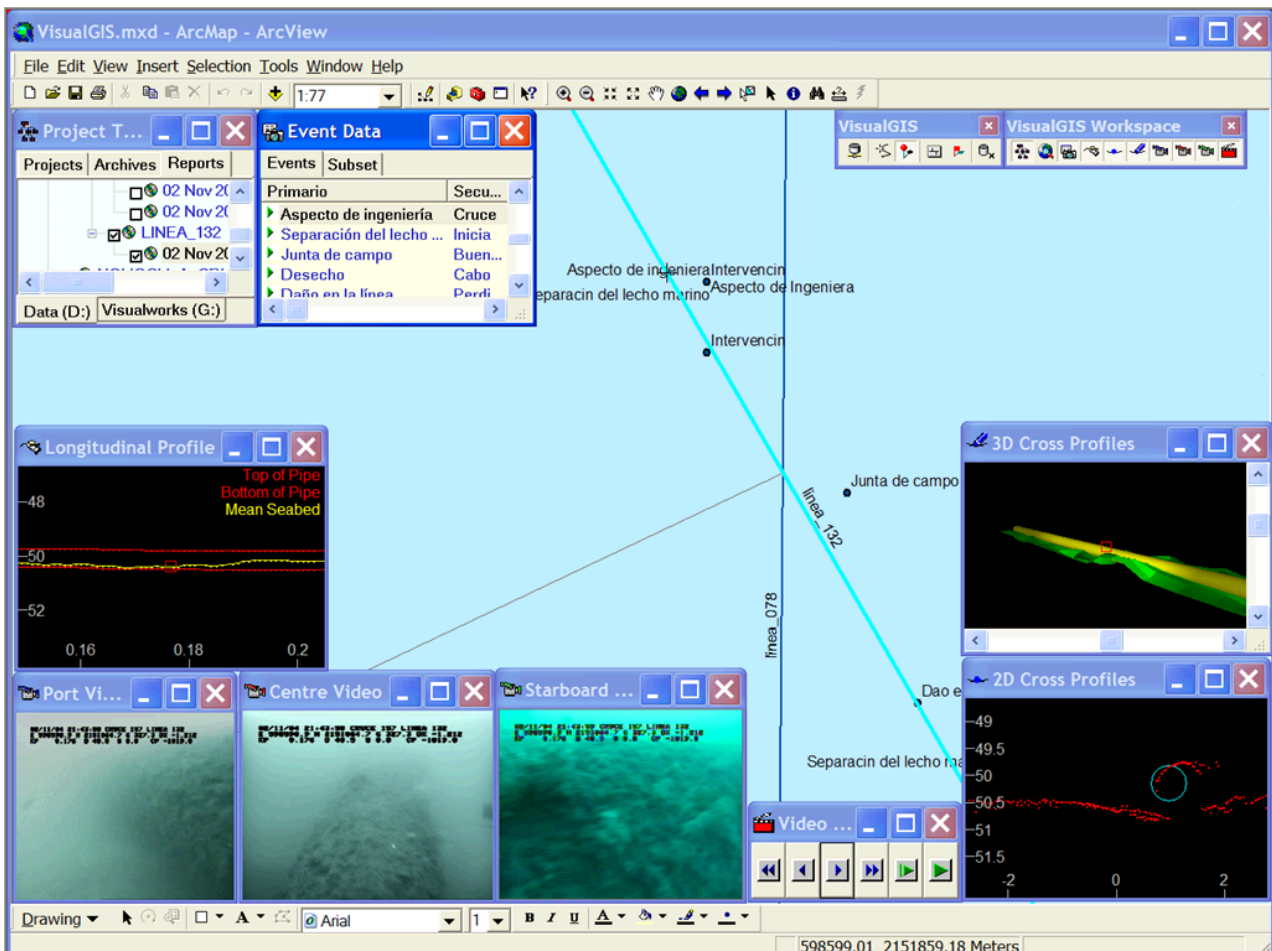

VisualGIS is a complete solution for viewing integrated survey data and digital video from subsea inspection surveys. Integrating GIS and the VisualWorks digital video system, VisualGIS allows the user instant accessibility to all survey datasets using a very simple user interface.

Point to the area of your map and zoom in to the features of interest. Then use VisualGIS tools to display position data, inspection events and pipeline/seabed information including cross profiles as well as viewing the related video file at the correct time. All this can be done from your desktop PC.

Principal Benefits

- ◆ Saves time – faster reporting
- ◆ Instant access to video
- ◆ View current and historic data side by side
- ◆ Display existing field data
- ◆ ESRI ArcGIS™ compatible
- ◆ AutoCAD™ compatible

VisualGIS can integrate your existing charting data with new digital video inspection surveys to provide a simple, yet powerful tool for the analysis of all your information. You even have the ability to perform year on year comparison of your survey inspection data.

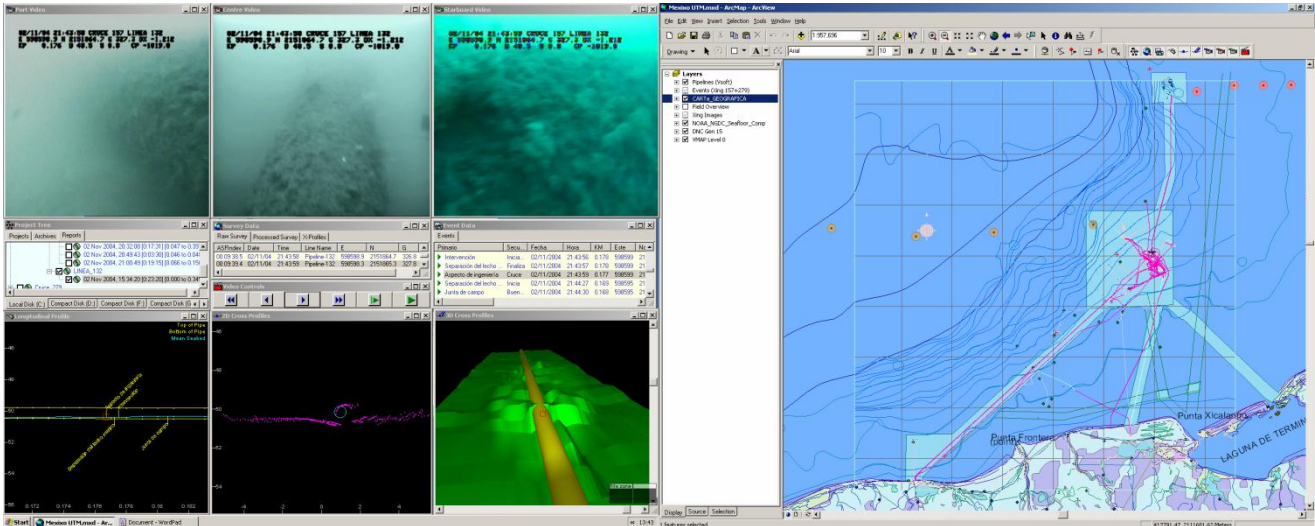

Single Screen View

Principal Features

- ◆ Integrates with VisualWorks Digital video
- ◆ Year on Year Pipe Comparison
- ◆ Links to Image Stills
- ◆ Hyperlinks to Reports
- ◆ Data Import Functions

Data Selection Options

- ◆ Map Position
- ◆ KP (Distance along Pipe)
- ◆ Geographical Position
- ◆ Events Listing
- ◆ Survey Project

Dual Screen View

Summary

- ◆ Integrates GIS and Digital Video
- ◆ Links ArcGIS™/AutoCAD™ with VisualWorks
- ◆ Access all your data via Graphical Interface
- ◆ Simple Access to all your Survey data
- ◆ Developed in partnership with VisualSoft Limited

Autodesk
Authorised Developer

Versions

- ◆ ESRI ArcGIS™ extension
- ◆ Autodesk AutoCAD™ extension
- ◆ Standalone viewer – using free ESRI ArcReader™ platform
